Work Experience:

February 2023 - Present   Casey's General Stores - Software Engineer   Ankeny, IA
- Rewrote Fuel Prices API and Client to improve functionality, implemented validation, unit and integration tests and migrated infrastructure to Azure
- Refactored existing web scrapes to standardize logic, consume the new API Endpoints and optimize performance (avg. 92% runtime reduction per scrape)
- Continued tracking workflow via JIRA and maintained source code and deployments via Azure Devops
- Continued providing rotational 24/7 support

March 2022 - February 2023   Matlen Silver - .NET Engineer   Somerville, NJ
- Implemented and maintained full stack solutions to legacy ASP.NET systems
- Lead Engineer on the successful integration between RingCentral Communication Systems into Bullhorn CRM
- Integration work on a 3rd Party Timesheet system including generating multiple CSV files and SFTP data feeds
- Lead Engineer on the implementation of a 3rd party ticketing system, including multiple API integrations for clients, consultants and internal employee information

May 2017 - March 2022   Casey's General Stores   Software Engineer   Ankeny, IA
- Lead Engineer on the successful integration with Gravitate into our Dispatch and Verizon Connect systems via Rest API feeds
- Lead Engineer on the successful integration with Verizon Connect to ensure continuous support for drivers and dispatch systems, ensuring 24/7 operational efficiency.
- Maintenance and feature work on external facing dispatch system managing over 1000+ fuel deliveries per day
- Mentored and trained new hires and interns, contributing to their successful transition to full-time roles within the company.
- Developed and maintained robust processes in .NET languages, encompassing batch applications, user interfaces, and shared libraries.
- Established and managed SFTP and API integrations in collaboration with third-party companies.
- Utilized ServiceNow & JIRA for workflow tracking and maintained source code via Azure Devops
- Provided rotational 24/7 support using PagerDuty, custom logs and alerts
